TOPIC: THE POTENTIAL OF MINING FOR SUSTAINABLE DEVELOPMENT

INSIGHT: The President of Ghana in His Key note address will share insights on how and the need to take strategic position in the mining industry.

Ghana is the leading gold producer on the continent, accounting for about a third of total gold production. We have come a long way, and this is the right time for Ghana to take advantage of its position to build a more integrated mining industry. Looking at the current growth of mineral production in the sub-region provided by Ghana, the government, policy holders, regulators and the entirety should therefore take advantage of making the country the hub of mining support services in West Africa.

THE FUTURE OF GHANA'S PHYSICAL GOLD PANEL
GOLD TRADING AND EXPORT FORMILIZATION

INSIGHT

Africa continent produced a total of 841 Tons of Gold in 2018, that represented 24% of the total global gold production. However, most gold from the continent are exported without adding value, illegal smuggling of gold and fraudulent representation are the hindrance of trading effectively.

Certainly for a continent that has abundance of gold as a key natural resource should create a veritable doorway to the financial sector and ensure effective gold trading. It is hoped that, at the end of the panel, critical regional issues would be addressed to ensure effective supply chain and streamlining the trading sector of gold to create sustainable jobs.
